EDUCATION

Boston University | Boston, MA

September 2023 – May 2027

B.A. & M.S. in Computer Science

- GPA: 3.76
- **Relevant Coursework:** Web Application Development; Database Systems; Distributed Systems; Data Mining & Warehousing; Compiler Construction; Computer Systems; Data Structures & Algorithms

EXPERIENCE

Software Engineering Intern

May – August 2026

Principal Financial Group

Charlotte, NC

- Constructing AWS data pipelines to manage GitHub Copilot & Claude Code developer budgets for the AI Enablement team

Software Development Intern (Part-Time)

June – August 2025

ClinicMind

Remote

- Debugged & maintained a portal for healthcare practitioners using **Angular (v17+)** with **TypeScript & TailwindCSS**
- Collaborated with QA and management to clarify bug priorities and communicate fix decisions
- Ensured smooth integration of UI fixes into production via GitLab CI/CD pipelines & Storybook

Data Analytics Intern (Part-Time)

May – August 2025

Aspire High Youth Development

Remote

- Directed a team of 5 interns to analyze survey data from Aspire High's educational programs
- Identified KPIs and designed **Looker Studio** dashboards to provide actionable insights for educators
- Automated survey data processing with **JavaScript**, saving 2+ hours of work for specialized dashboards
- Reduced workload by 50% by refining the project scope, establishing technical standards and documentation

Treasurer & Coding Instructor

March – April 2025, January 2026 – Present

Girls Who Code

Boston, MA

- Managed a \$2.7K club budget using university financial systems and Google Sheets across 19 tech events
- Secured \$1.3K+ in additional funding by presenting budget pitches and requests to 4 campus funding sources
- Taught 10 girls (grades 6-12) introductory **Python** through weekly remote lessons; designed lessons and assignments

PROJECTS

Sewage & Algae Blooms Monitoring Tool

January 2026 – May 2026

Center on Media Innovation for Social Impact

- Migrated sewage & algae pollution monitoring data from Google Sheets to Google **BigQuery** using **Python** and **SQL**
- Scheduled **Playwright** web scraping cron jobs & data processing pipelines to structure local government data with **Docker**
- Translated product goals into Figma low-fi wireframes, initial sitemap, and design system with a product designer

Boston Cop Watch

February 2026

- Built a full-stack platform featuring an interactive map of local youth policing patterns by zipcode and Gemini-generated police interaction scenarios for community members with a cross-functional hackathon team of 5
- Utilized **React.js** and GeoJSON to map and visualize **SQL** data analyses of Boston police and youth incidents

Ohana Village Foundation Website

October 2025 – February 2026

- Designed a donor-facing website in **Figma** and GoDaddy web builder for a nonprofit client serving Japanese elders
- Presented weekly with a team of 4 in client standup meetings to gather feedback on brand voice and UX, translating their input into concrete design and content updates, improving accessibility for elderly users

Sounding Out Parkinson's Disease

July – September 2025

AI4ALL Ignite Fellowship

- Developed a **Python-based ML** model predicting Parkinson's disease using tabular speech data in a team of 3
- Led group meetings, XGBoost model training, and class imbalance handling, achieving a 83% accuracy & 0.81 ROC-AUC
- Selected as 1 of 10 teams (from a 400+ student pool) to present at the final symposium

SKILLS

Programming: Java, Python, HTML, CSS, TailwindCSS, JavaScript, TypeScript, Angular (v17+), SQL, Golang

Tools/Libraries: React.js, Next.js, Git, GitHub, NumPy, Pandas, Looker Studio
